EPIC®

Healthcare Analytics

We invest significant resources into modeling our healthcare clients' risks to provide sound decision support. By using current, detailed data – the same data used by underwriters – we keep pricing honest and optimize insurance program design.
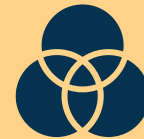

Professional Liability

- Pricing efficiency for risk transfer layers
- Analysis of impact of changes of captive retention
- Loss development analysis
- Claims lifecycle benchmarking

Population Health

- Specific and aggregate stop loss reinsurance
- Population health risk across the enterprise
- Use of captive insurance to manage risk
- ACO track selection

Cyber Risk

- Vulnerability diagnostics
- Simulation model for limits decision support
- Benchmark analysis
