

CONSTRUCTION SAFETY WEEK

Recognizing Your Team Positive Safety Recognition

It's essential to recognize and celebrate the outstanding safety behaviors observed on our construction sites. During your walkthroughs, take the time to highlight and commend the following safety practices:

- **Consistent Safe Behaviors:** Recognize teams and individuals who consistently demonstrate safe behaviors, such as proper use of PPE, adherence to safety protocols, and maintaining clean and organized work areas. These actions not only protect the individual but also set a positive example for others on the site.
- **Proactive Risk Management:** Applaud those who actively identify potential hazards and take steps to mitigate risks, showing a commitment to preventing accidents before they occur. Encourage near miss reporting as part of this proactive approach. Near miss reporting helps identify potential hazards before they result in accidents. By fostering an environment where near miss reporting is valued and acted upon, we can significantly enhance overall site safety and prevent future incidents.
- **Effective Safety Communication:** Praise supervisors who ensure clear and effective communication regarding safety practices and updates, fostering a culture of transparency and vigilance. Effective communication helps ensure that everyone on site is aware of safety protocols and any changes that may occur.
- **Safety Leadership:** Acknowledge individuals who lead by example, encouraging their peers to follow safety protocols and promoting a positive safety culture. Leadership in safety is about more than just following rules; it's about inspiring others to prioritize safety in their daily tasks.
- **Team Collaboration:** Celebrate the collaborative efforts of teams working together to uphold safety standards and support one another in maintaining a safe work environment. Teamwork is essential in creating a culture where safety is everyone's responsibility.

By recognizing these positive behaviors, we reinforce the importance of safety and encourage continued excellence in our safety practices. Let's make a concerted effort to honor those who go above and beyond to keep our sites safe.

Ready to Become EPIC?

EPIC's Construction & Infrastructure (C&I) Group represents clients in all subsets of the industry, including general contractors, specialty contractors, architects and engineers, real estate and institutional owners and developers, energy and environmental service firms, and construction material suppliers.
